Moving Towards Data Integration: Developing a Patient-Focused Integrated Data Dictionary and Repository

Sept. 28, 2023

Brianna Orava NP, PhD & Grace Spiro MSc, PhD

Disclosure

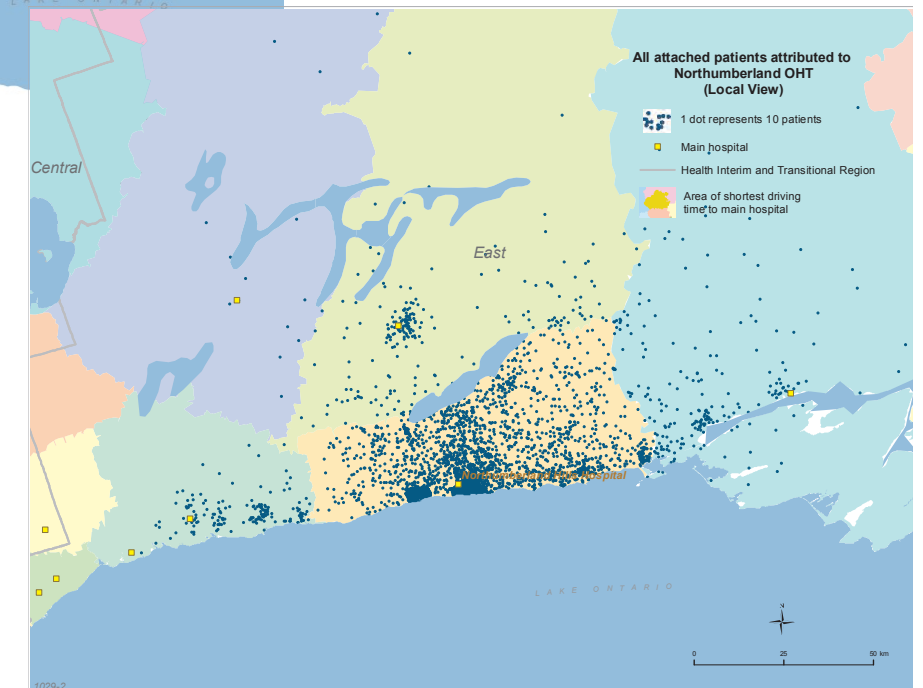

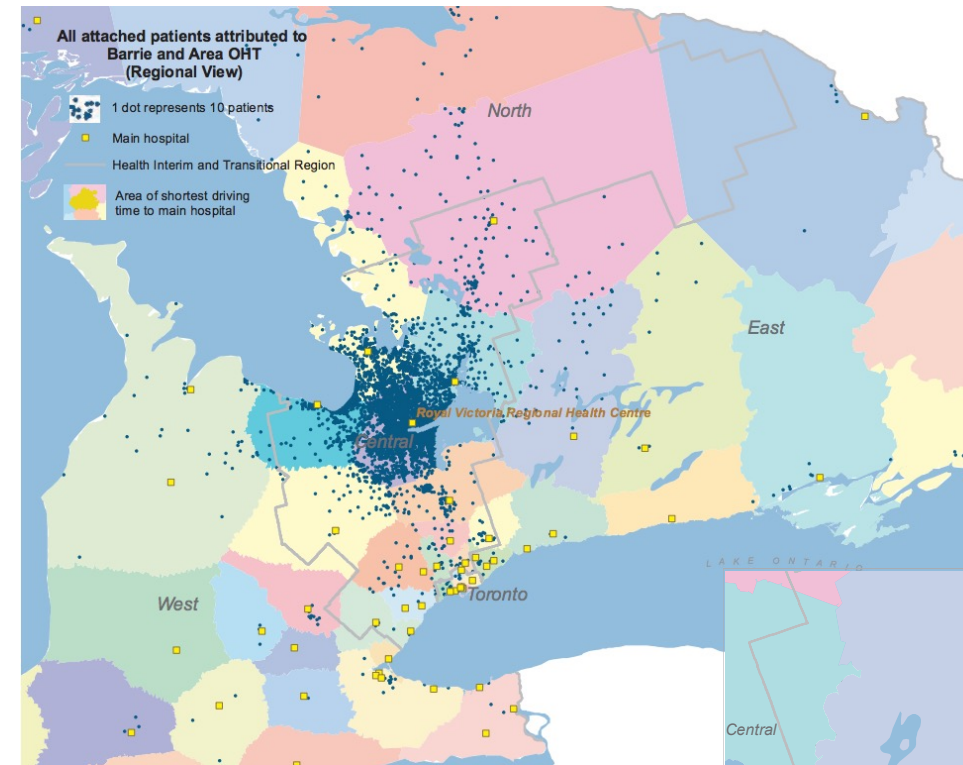

- Post-doctoral embedded fellowships within Ontario Health Teams
- No other disclosures

Session Outline

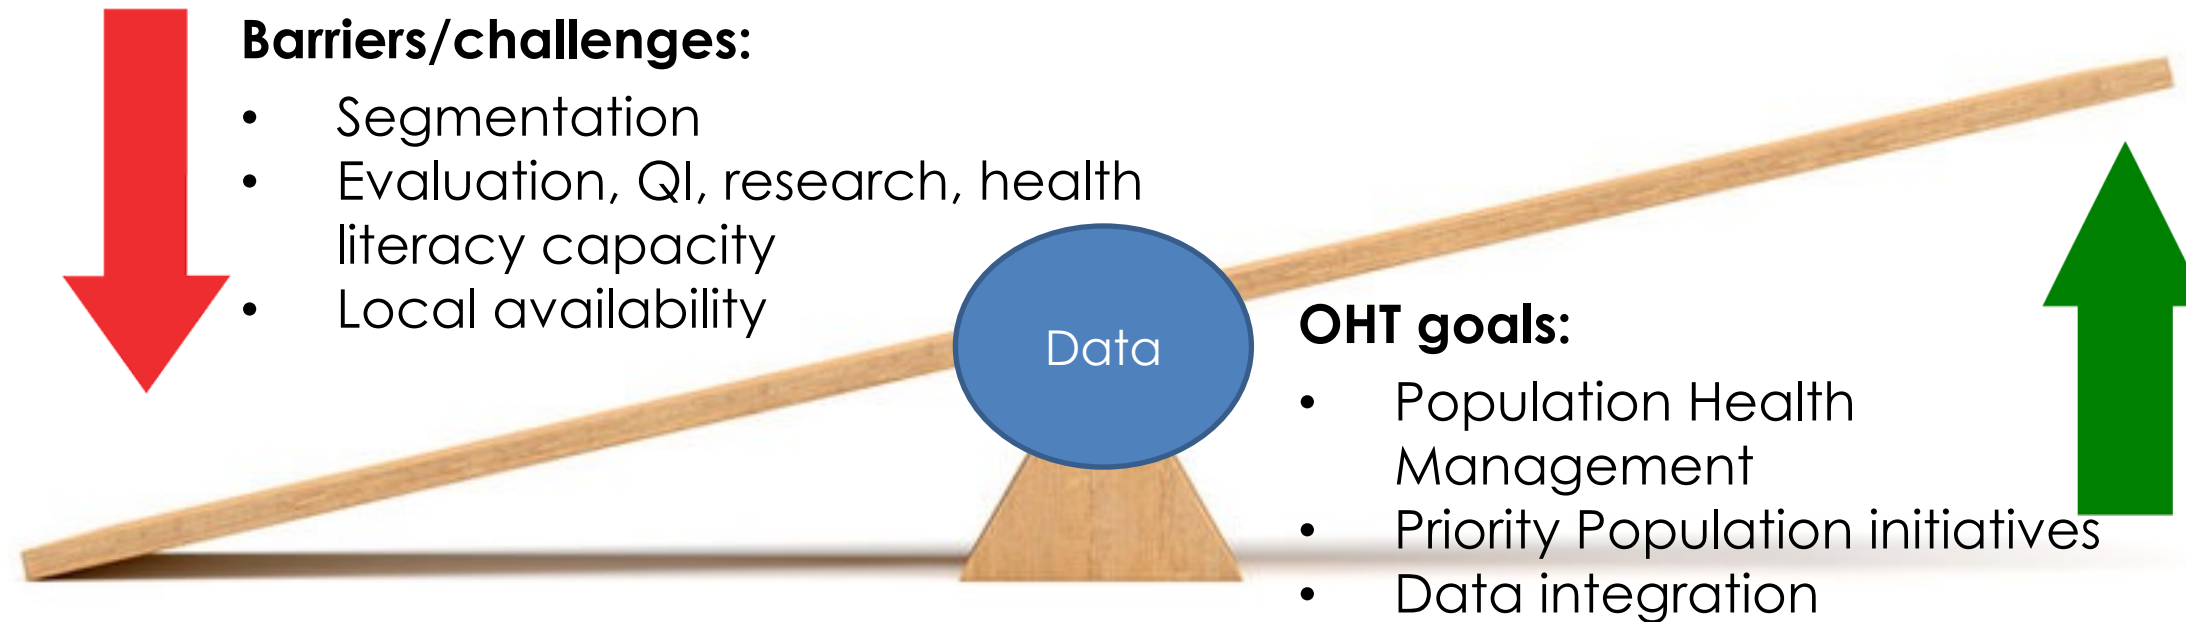

- Background & Rationale
- Methods
- Data dictionary process
- Lessons learned
- Next steps: Toolkit introduction

Background

- Collective insights from two different OHTS
- Objectives: integrated care based on the quadruple aim

Rationale

Methods

- Literature review
- Conceptual framework of integrated care
- Regional Approaches
- Collaboration with partnering stakeholders

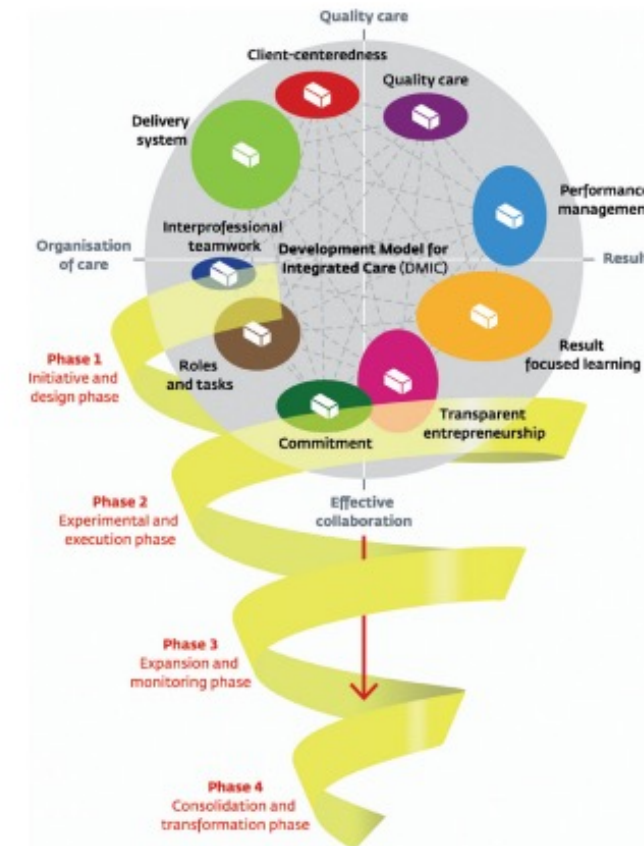

Figure 1. A development model for integrated care.

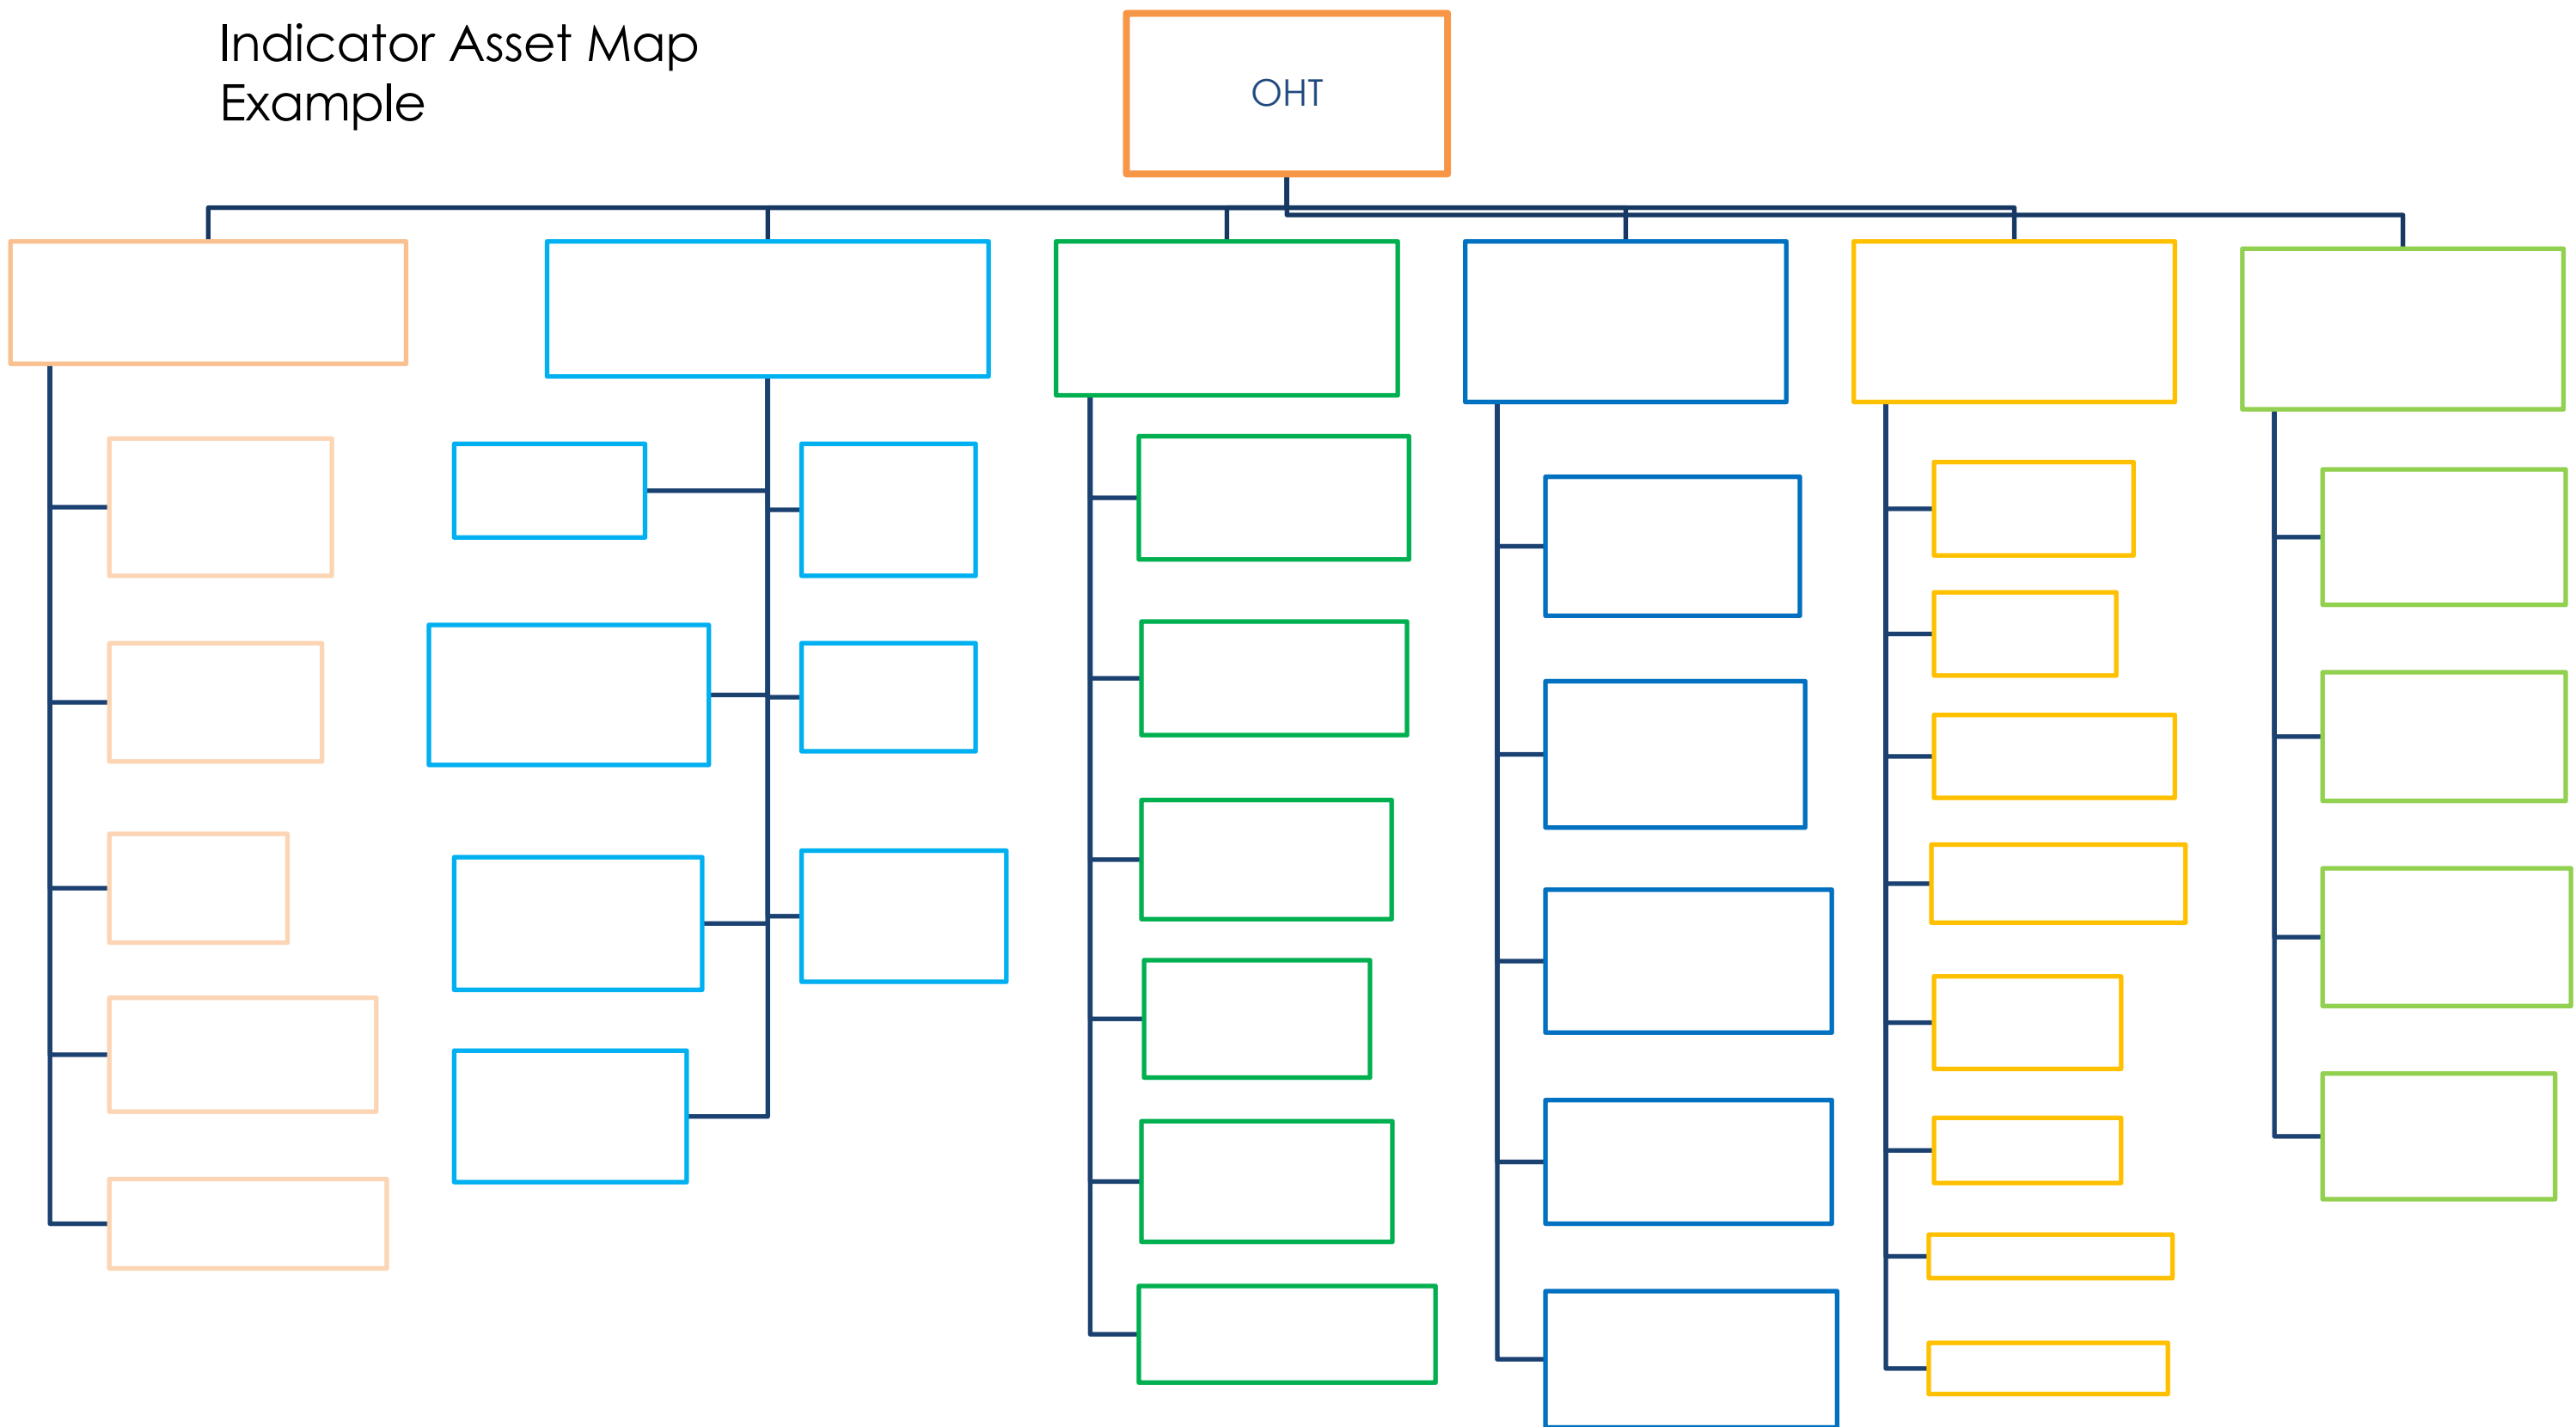

Key Terms

Data Integration Process

Indicator Asset Map
Example

Lessons Learned

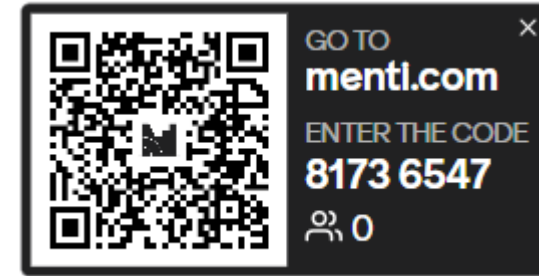

Next Steps

- Knowledge translation toolkit for spread and scale
- Continued engagement to build capacity

Toolkit Overview

- Steps involved in moving towards OHT data integration
- Toolkit is comprised of:
 - Guided webinar
 - Templates
 - Step-by-step process outline

Survey

- Please use your phones/computer to log on to mentimeter:
 1. Please indicate your current role.
 2. Does your OHT currently have a data evaluation plan/framework
 3. If so, is data integration part of the plan?
 4. Are Key Performance Indicators included in your OHT's strategic plan?
 5. Which data and evidence resources do you currently most rely on?
 6. Would a data integration toolkit be of value to your OHT?
 7. What is your preferred knowledge mobilization method to learn about the data integration approach?

Final Takeaway

- Data dictionary process can be a key enabler to helping OHTs achieve their goals of population health management and priority population initiatives, as well as integration
- The process will evolve as the OHT matures

Thank you and Questions

- Thank you to our Ontario Health Teams
- Thank you to the OHT Impact Fellow Program and IHPME Staff and Faculty
