## Item | Purpose | Time allotted
--- | --- | ---
1. Welcome | | 5 min
2. Update about actions based on last call | To summarize actions that have been taken by COVID-END and its partners  
- Based on insights from the last call [next page](#) for three sets of living evidence products and processes undertaken as a result of the panel’s input  
- More generally [→](#)  
  - Continued updates to the suite of living evidence syntheses about vaccine effectiveness (adults, children and adolescents, and waning immunity)  
  - Update to the evidence syntheses about vaccine effectiveness in the immunocompromised and about myocarditis among those vaccinated  
  - Rapid evidence synthesis about border measures  
  - Fully searchable version of the COVID-END inventory of evidence syntheses  
  - Complementary work on: 1) inventory of living evidence syntheses on public-health issues; 2) intersections between climate action and public health; and 3) monkeypox | 5 min
3. Review of priorities | To hear from panelists about emergent issues (or previously missed long-term and recurring issues) that may need to be prioritized | 35 min
4. Updates on Evidence Commission | To provide an update about the Evidence Commission  
- Three priorities: 1) formalizing and strengthening evidence-support systems; 2) enhancing the global evidence architecture; and 3) putting evidence at the centre of everyday life  
- Rapid jurisdictional assessments, with significant progress in engaging the Canadian federal government | 10 min
5. Other business | | 5 min

Documents from previous meetings can be found [here](#).

Upcoming panel meeting dates (all meetings to take place from 12-1 pm EDT):  
- 28 September
Public health measures

- Support for re-framing from government mandates to personal responsibility, and why we need to keep helping others, including the immunocompromised, by taking precautions ourselves ➔ New living behavioural-sciences document from Justin Presseau
- Effects of removals of vaccine and other mandates, and prepare for if/when we have to re-introduce measures
- Be alert to emergence of variants in, and transfer from, animal populations

Clinical management

- Mental health for public and health workforce ➔ New living citizen panels and stakeholder dialogues on the HHR crisis and on mental wellness among the public and among providers
- Prescribing antivirals like Paxlovid (while supply constraints and given primary-care access challenges)

Health-system arrangements

- Health workforce crisis (50% with intention to leave) ➔ New living citizen panels and stakeholder dialogues on the HRH crisis
- No separation of COVID-19 patients from other patients, and sometimes placing immunocomprised alongside those with COVID-19 symptoms
- Seniors’ residences and other settings are easing off in how they support adherence to public-health measures
- Modes of clinical practice where large numbers of providers are off with COVID-19
- Surgical backlogs (funding but delivery)

Economic and social responses

- Public transporation for return to office
