Create trustworthy and living guidance
Digitally structured guidelines, HTA and decision aids, sharing evidence summaries from reviews

Implement evidence and guidance
CDSS in the EHR, care plans, pathways and local quality improvement initiatives

Synthesize living evidence
Relevant, reliable and timely systematic reviews

Cochrane
HTA agencies
Academic institutions
Adaptive platform trials (WHO, REMAP-CaP)
396 registered trials + other research
Registries, cohort studies

Produce evidence
Relevant and reliable primary research, real world data

Evaluate and improve practice
Population-based data in registries, quality Indicators, data from EHRs

Digitally structured data
Culture for sharing and innovation

Tools and platforms
Orchestration, governance, support

Coordinated processes
Global standards

Disseminate to policymakers, clinicians and patients
Digital, multilayered and user-friendly HTA-reports, guidelines and decision aids on all devices and in web-portals, ready for re-use, adaptation and plug-ins

Global guidance (WHO)
Country guidance (CDC, NICE++)
Professional societies ++
National + local guidance, adapted and plugged into health care systems

Common methods
