The dialogue was very **informative, productive and thought provoking!**

The format of the process and **diversity of participants facilitated progressive engagement**

It was exciting to be part of the citizen panel – we, as Canadians, sometimes don't take action when it comes to healthcare. It was great to **hear other people and express my own opinions to create change in the health system**

Excellent facilitation and deep listening, it has been some time since I've been at a meeting where there was such focused attention

Thank you for **involving the community** and providing us with an opportunity to have **our voices heard**

50+ stakeholder dialogues held over 8 years

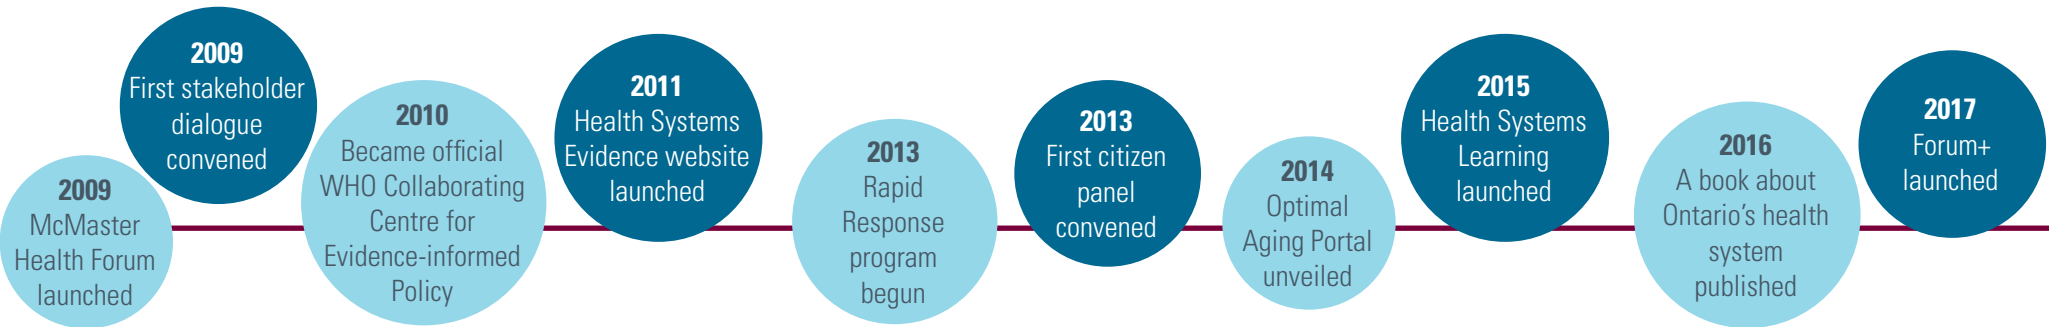

35+ citizen panels convened over 4 years

30+ rapid syntheses produced in 3, 10 or 30 days

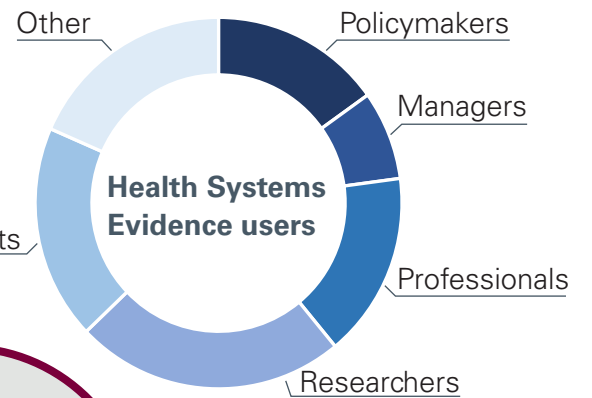

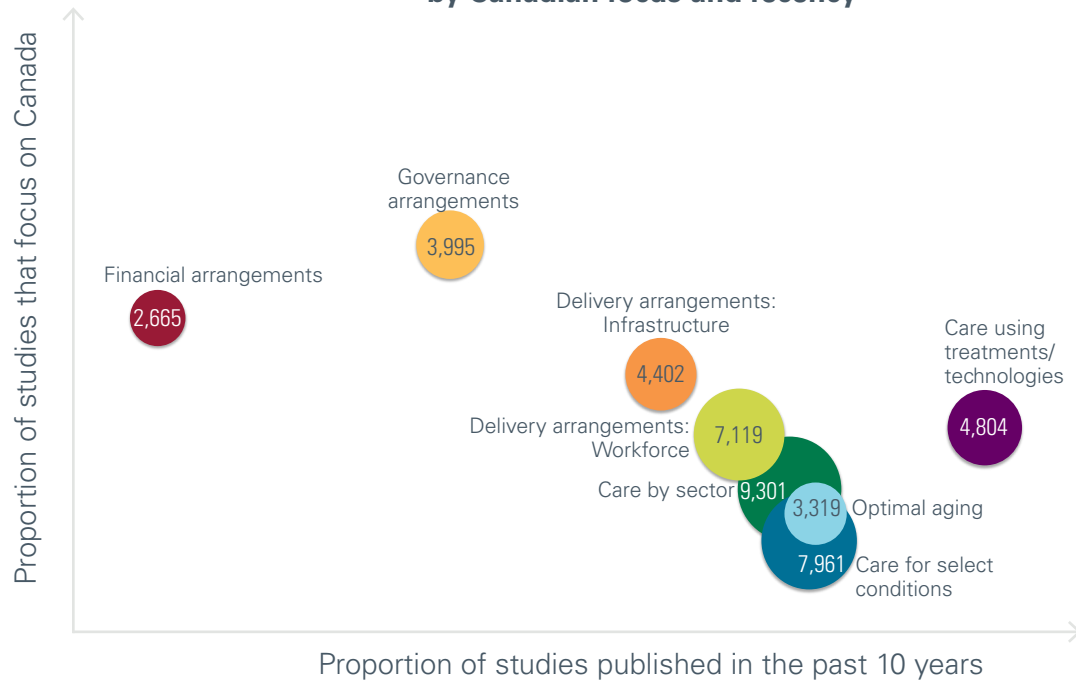

Soon to be the host of the world's most comprehensive source for systematic literature on **16 program and service areas**
