

Ontario Health Teams will need to put in place eight OHT building blocks in order to become clinically and fiscally accountable for delivering a full and coordinated continuum of care to a defined population within Ontario.

Defined patient population

Who is covered, and what does 'covered' mean?

Digital health

How are data and digital solutions harnessed?

In-scope services

What is covered?

Leadership, accountability and governance

How are governance and delivery arrangements aligned, and how are providers engaged?

Patient partnership and community engagement

How are patients engaged?

Funding and incentive structure

How are financial arrangements aligned?

Patient care and experience

How are patient experiences and outcomes measured and supported?

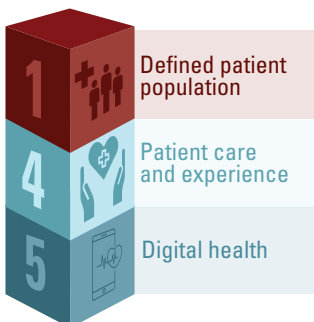

Performance measurement, quality improvement, and continuous learning

How is rapid learning and improvement supported?

How the building blocks come together to advance population-health management (PHM)

Components from each of the eight building blocks can be used to support OHTs as they work through the four steps of PHM.

Step 1: Segmenting for needs, risks and barriers

Step 2: Co-designing care models and service mix

Step 3: Implementing and increasing reach

Step 4: Monitoring and evaluating
